### Introduction

This guide provides instructions to install and uninstall Travelport Smartpoint v.6.5 for use with Galileo Desktop.

This guide specifically supports desktop installation of Smartpoint for travel agents. For more detailed installation instructions, including network installations, please refer to the *Technical Installation Guide* for Smartpoint v6.5..

# **Technical Requirements**

Please confirm the following software, hardware, and system requirements before installing Travelport Smartpoint v6.5.

### Requirements for Desktop Users

The following minimum and recommended requirements apply to desktop installation of Smartpoint.

Operating System	Microsoft Windows® 7 or later
Minimum Processor	Performance is based on RAM and CPU speed. Smartpoint has been tested successfully to work well on a Pentium IV 1.8GHz.
	<ul> <li>Most of the modern hardware is using Core Duo processors or above.</li> </ul>
	<ul> <li>Travelport Smartpoint supports GPU Acceleration.</li> </ul>
Minimum Memory	Smartpoint has been tested successfully on PCs with 512MB RAM.
Recommended Memory	1 GB RAM
Recommended Disk Space	3 GB

### **Requirements for Citrix Users**

Smartpoint has been tested successfully on Citrix severs for some customers. However, individual variances may apply for each installation; therefore, we recommend thorough testing for each Citrix installation at a customer site.

Smartpoint has been tested with the following system configuration for Citrix installations.

Operating System	MS Windows Server 2003 R2 Standard with Windows Service Pack 2
Processor	2.8 GHZ CPU2, 2 GB RAM.
Application Virtualization Service	Citrix XenApp 5.0
Software Framework	Smartpoint uses Microsoft .NET 4.0, and Windows Presentation Foundation 4.0 (WPF 4), therefore as long as that underlying technology is supported, Smartpoint should work.
Minimum Memory	Smartpoint has been tested successfully on PCs with 512MB RAM.
Recommended Memory	A minimum of 150Mbytes RAM per Smartpoint Instance with the current setup. It is recommended to allocate more memory per user for future use (plugins).
Browser	Internet Explorer 7

### Prerequisites

Before you install Travelport Smartpoint v6.5, please confirm that:

• Galileo Desktop 2.4 or later is installed and working on your PC.

Travelport Smartpoint checks to ensure that Galileo Desktop 2.4 or later, and it will not install on earlier versions of Galileo Desktop.

- Galileo Desktop is closed.
  - ▲ If Galileo Desktop is running on your PC, please close it before installing or updating Travelport Smartpoint.

# Accessing the Installation Files

Depending on your version of Smartpoint and your installation environment, you may access the Smartpoint installation files in one of several ways:

- From the Automatic Update feature in Smartpoint.
- Via a software push from your local portal or an automatic push from the Travelport ESD (Electronic Software Distribution) site.
- Manual updates.

The installation typically contains two files: *setup.exe* and the *.msi* installer. You must run *setup.exe* first to confirm the presence of Microsoft .Net 4.0 Client Profile.

- If .NET 4.0 was not previously installed, the .NET 4.0 Installation may require the PC to be rebooted several times.
- If .NET 4.0 is installed, the .msi installer automatically runs. Follow the Setup Wizard instructions on page 6.

### Automatic Updates in Smartpoint

If you are using Travelport Smartpoint v2.3 or later, you can download new versions of Smartpoint automatically:

#### To automatically install Smartpoint updates:

- 1. From the Tools menu, select Automatic Update Options.
- 2. Click CHECK NOW.
- 3. Click **UPDATE**.
- 4. Click **OK** to confirm the installation.

### Distributed Updates from ESD or a Network Servers

Smartpoint installation files may be obtained from your local portal or an automatic push from the Travelport ESD (Electronic Software Distribution) site. With this distribution, the Installation file may include extraction of the files as part of the installation.

Install	
WinZip will extract all files to a temporary folder and run the	OK
setup.exe program.	Cancel
✔ Minimize during install	Help

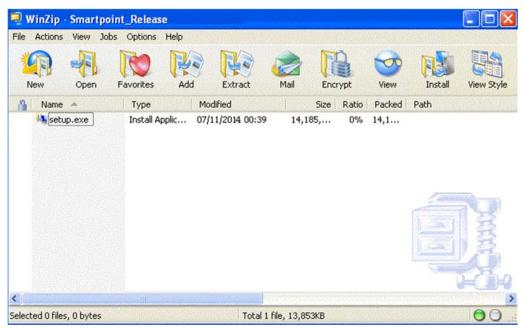

### **Manual Updates**

The Smartpoint installation files are typically distributed as a compressed Zip (.zip) file contains two files: *setup.exe* and the *.msi* installer. Before you install, you will need to:

- Extract the installation files from the Zip file.
- Confirm that your installation files are not encrypted.

#### Extracting the Installation Files

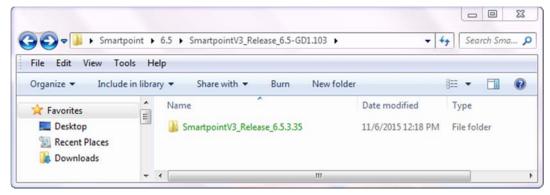

1. Open the Zip file.

- 2. Click the **Extract** icon or click **Extract all files** from the menu.
- 3. Click **OK** to extract all files in the folder and begin the installation. Follow the Setup Wizard instructions on page 6.

#### Unencrypting the Installation Files

Internal Travelport employees may have had their files encrypted. Before you begin the installation, confirm that your installation files are not encrypted; these folders and files display in **green**.

#### To unencrypt folders:

1. Right-click on the installation folder and select **Properties** to display the Properties dialog box.

ieneral	Sharing	Security	Previous Versions	Customize
L	S	martpointV	3_Release_6.5.3.35	
Type:	Fil	e folder (.3	5)	
Location	n: C:	\Users\C0	55245\Desktop\Sm	artpoint\6.5\Smar

pr	operties
Comp	operties
Comp	ress or Encrypt attributes

- 3. Clear the Encrypt contents to secure data check box.
- 4. Click **OK** to display the Confirm Attribute Changes warning.

Confir	m Attribute Changes
You	have chosen to make the following attribute changes:
	decrypt
	ou want to apply this change to this folder only, or do you want to it to all subfolders and files as well?
	Apply changes to this folder only
	Apply changes to this folder, subfolders and files
	OK Cancel

- 5. Select Apply changes to this folder, subfolders and files.
- 6. Click OK.

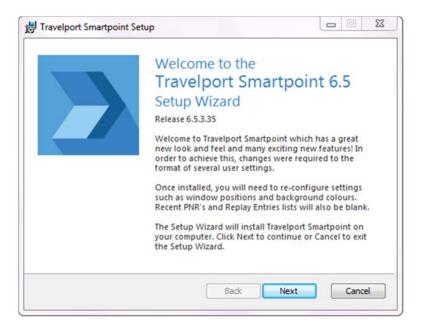

#### Running the Manual Installation

- 1. In the extracted installation folder, run the **setup.exe** file. (Ignore the msi file, which is called by the setup file.)
- 2. Follow the Setup Wizard instructions on page 6.

## Installing Travelport Smartpoint

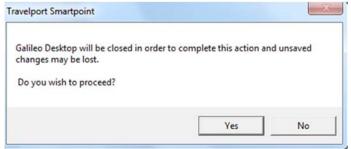

After you open the installation files, the Welcome window of the Travelport Smartpoint Setup Wizard is displayed.

You do not need to uninstall your previous version of Smartpoint. The previous version is uninstalled during the installation of Smartpoint v.65.

1. Click Next.

If Galileo Desktop is open, a warning message is displayed.

2. If all of your Galileo Desktop work is saved, click Yes.

The License User Agreement dialog box is displayed.

	Agreement			
Please read the fol	lowing license agreer	ment carefully		_
TRAVELPORT	CLICK-WRAP	P LICENCE AGRE	EMENT	-
IMPORTANT -	READ CAREF	ULLY: "You," "you	r," and	
		using or initiating the		s
Software. Your	use of this softw	vare and any associa	ted software or	
documentation p	rovided by Trave	elport or an authorize	d Travelport	
distributor or aff	iliate, as applicab	ole (together, "Trave	port") is subject	
to the terms and	conditions set for	orth herein (the "Clic	k-Wrap	
Agreement") an		ber agreement with		
	e Click-Wrap A	greement, the "Licer	ise Agreement")	. •
	•	eement		

- 3. Select I accept the terms in the License Agreement.
- 4. Click Next.

If Relay Quick Commands were previously installed on your desktop (via Galileo Desktop), the following dialog box is displayed.

▲ Smartpoint v2.3 and later includes Relay. However, Relay is not installed in this Smartpoint installation. If Relay was not previously installed via Galileo Desktop, this dialog box does not display.

Relay Quick Commands	
	each Relay application that has a CheckMark.
Remove the checkmark if you do not	wish to create a quick command.
Itinerary Capture	
V Queues	
V PNR/BF	
🔽 ClientFile/Profile	
📝 Ticket Exchange	
Recovery	
🔽 Rules	
🔽 EStatus	
	Select All

5. By default, all **Relay Quick Command** options are selected. Clear check boxes for any Relay applications that you do not want to load into Quick Commands.

The Destination Folder dialog box is displayed.

Destination Folder		
Click Next to install to the o	default folder or click Change to	choose another.
Install Travelport Smartpoin	t to:	
C:\Program Files (x86)\Trav	velport\Smartpoint\	
Change		

- 6. Select the location for the Smartpoint files.
  - Click **Next** to install the Smartpoint files in the default folder. The usual location is in the **Program Files\Travelport\** folder.

User data is stored in **the user\Local Settings\Application Data\Travelport**,\_inc and **user\Local Settings\Application Data\Travelport** folder, which is derived and not hard-coded to C: These locations typically work in Citrix environments.

Click Change to browse for another location. After the location is selected, click Next.

The Travelport Smartpoint Installation window is displayed.

$\geq$
or change any of your

- 7. Click Install.
  - On Windows 7, you may receive a message to confirm the installation. Click Yes to accept the Smartpoint installation.

▲ If the Setup Wizard determines that Microsoft .NET 4.0 or later must be installed, you may be required to reboot your PC several times during the .NET installation process.

The Status bar for the installation is displayed.

Travelport Smartpoint Setup		
Installing Travelport Smartp	point	
Please wait while the Setup Wizard i	nstalls Travelport Smartpoint.	
Status:		

When the installation is complete, the Completed Setup Wizard window is displayed.

Completed the Travelport Setup Wizard	martpoint
Click the Finish button to exit the Setup V	Vizard.
Back	Cancel

- 8. Click Finish to complete the installation and close the Setup Wizard.
- 9. Run Galileo Desktop. By default, you should see two windows at the top of Galileo Desktop: the PNR Viewer and the main Terminal Emulator screen.
- 10. When Focalpoint Windows is visible, click the new **Travelport** icon in the toolbar. A new Desktop shortcut and Galileo Desktop toolbar button are created.
  - Because the .NET Framework needs to load in the memory, there may be a slight delay each time that you run Smartpoint after you boot up your PC.

- ▲ If a previous version of Smartpoint was installed, a pop-up warning message may indicate that a corrupt file exists. Accept the message and launch Smartpoint again.
- 11. If desired, you can resize and adjust your windows. From the **Application** menu, select **Save Windows Positions** to store your new layout.
- 12. You can also change the fonts and other display items, and even add more terminal windows. From the **Application** menu, select **Application Settings**. After you change your settings, click **Save** to store your changes.

### Testing the Smartpoint Installation

To test your Smartpoint installation:

- 1. Sign on to Galileo Desktop or to the Smartpoint Framework.
- 2. Make sure you are emulated to a valid PCC (Pseudo City Code). Typically, agents are preset to a particular PCC. To confirm your PCC, type >QCA to display the PCC.
- 3. Test point-and-click functionality to ensure that the Smartpoint Framework can properly access its internal database
  - a. Type any air availability command such as: **ABCNMAD**.
  - b. When air response is displayed, click on the airport codes and to confirm that they are decoded properly.
- If no version of the .NET Framework existed on your machine before installation, you may see an error when you try to execute certain entries in Smartpoint:

Unable to load DLL 'sqlceme.dll'

To fix this problem, download and install the *Microsoft Visual C++ 2005 Redistributable* at: <u>http://www.microsoft.com/downloads/en/details.aspx?FamilyID=200b2fd9-ae1a-4a14-984d-389c36f85647&displaylang=en</u>

If Galileo Desktop is uninstalled and then re-installed on your machine, you will also then need to uninstall and re-install Smartpoint.

## Uninstalling Travelport Smartpoint from Your Desktop

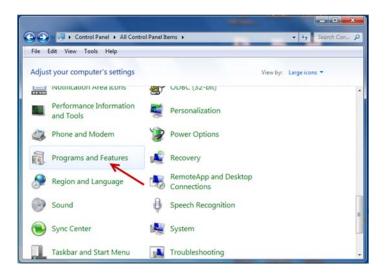

The process for uninstalling Travelport Smartpoint may vary slightly depending on your operating system. The following instructions apply to Microsoft Windows® 7.

To uninstall Travelport Smartpoint:

1. Click the Start icon to open the Windows Start menu.

 From the Windows Start menu, select Control Panel to display the Windows Control Panel. The Control Panel may display icons or categories, depending on your selected Control Panel view option.

3. Click **Programs and Features**.

4. If necessary, click **Uninstall a program** to display the program list.
